

I want XM radio to continue to be able to air traffic and weather. What is with this government. They try to censor anything that they don't like, agree with, makes them look bad, or competes with their special or financial interests. I am beginning to feel like we live in a dictatorship. XM radio provides the variety I want in the format that I want. I pay for this as well. Traffic and weather is just one feature that I like on XM. Leave us alone. Tell the losers in Washington to worry about getting re-elected. Their current reign of censorship and media control is one of many issues that will topple them.
